Q4 2024

Year-end report January – December 2024

Financial summary October – December 2024

- » Net sales amounted to TSEK 4,580 (0).
- » Operating profit (EBIT) amounted to TSEK -56,889 (-39,754).
- » The result for the period was TSEK -54,259 (-44,140) and earnings (loss) per share before and after dilution were SEK -1.17 (-1.68).
- » Total cash flow for the period amounted to TSEK -79,197 (-63,400).
- » Cash and cash equivalents at the end of the period amounted to TSEK 566,716 (87,972).

Financial summary January – December 2024

- » Net sales amounted to TSEK 4,580 (5,959).
- » Operating profit (EBIT) amounted to TSEK -169,639 (-200,976).
- » The result for the period was TSEK -168,031 (-215,118) and earnings (loss) per share before and after dilution were SEK -4.54 (-8.20).
- » Total cash flow for the period amounted to TSEK 476,833 (-86,294).
- » Cash and cash equivalents at the end of the period amounted to TSEK 566,716 (87,972).

¹⁾ Of which 18 employees and 17 in-house consultants.

General information about the report

The information in this report refers to the Group unless otherwise stated. Comparative figures in brackets refer to the corresponding period of the previous year. Comparative figures in brackets for balance sheet items refer to the end of the previous financial year. This report has not been subject to the auditors review. The report has been prepared in a Swedish and an English version. In the event of any discrepancies between the versions, the Swedish version will take precedence.

Significant events during the period October – December 2024

- » On October 12, linaprazan glurate was presented at UEG, United European Gastroenterology Week.
- » On October 29, Cinclus Pharma announced that the company had reached agreement with the European Medicines Agency's (EMA) Paediatric Committee (PDCO) on the company's paediatric investigation plan (PIP).
- » On November 22, Cinclus Pharma announced that the company had reached an agreement with the US Food and Drug Administration (FDA) regarding the company's pediatric study plan (iPSP).
- » On November 28, Cinclus Pharma announced that the company's board of directors has decided to carry out a new

- share issue and immediately repurchase 854,430 C shares. The shares are being issued and repurchased in accordance with the long-term incentive programs, PSP 2024/2027 and ESOP 2024/2027, which were adopted by the extraordinary general meeting on June 3, 2024.
- » On December 4, the company announced that its leading drug candidate, linaprazan glurate, has received its first marketing approval for the treatment of gastroesophageal reflux disease (GERD). The approval by the National Medical Products Administration (NMPA) paves the way for commercialization in China in 2025.

Significant events after the end of the period

- » No significant events have occurred after the end of the period.

CEO STATEMENT

Linaprazan glurate approved in China for the treatment of GERD

The trend is clear. In many of the countries and regions where first-generation PCABs are launched, these are gradually taking over the market from the old proton pump inhibitors (PPIs). Our ambition is to develop a unique next-generation PCAB that meets the medical need and provides the conditions to do exactly what AstraZeneca did when they launched the next-generation PPI, Nexium, twelve years after the introduction of Losec, i.e. to take over the market.

The approval of linaprazan glurate in China is the product's first marketing authorization and a very important milestone and step in this work. The approval also reduces the development risk as it shows that the substance has good potential to be approved in other regions as well.

The fourth quarter of 2024 concluded an intense year for Cinclus Pharma. One of the highlights was the marketing authorization that linaprazan glurate received in December 2024 for the treatment of GERD in China. It is linaprazan glurate's first marketing authorization and therefore a very important milestone that reduces the development risk as it shows that the substance has good potential to be approved in other regions as well. The approval came after a successful Phase III trial in 380 patients conducted by our partner Sinorda Biomedicine (Sinorda)

in China. The study shows that linaprazan glurate is safe and effective. These good efficacy and safety data are solid and give confidence in success in our upcoming Phase III study.

The healing results of the Chinese study were also very good. Although Asian study data often show higher healing rates than Western study data, and small differences between PPIs and PCABs, we are encouraged that the Chinese study indicates that there are possibilities that our Phase III studies will be able to show even higher efficacy and greater differences compared to PPIs. The reason is partly that the daily dose in the Chinese Phase III study was 50 mg and we intend to use 100 mg, partly because we will use an improved formulation. By optimizing the dose and formulation, acid control is further improved. Furthermore, our Phase III study will have a higher proportion of

“more difficult” patients, i.e. C and D patients compared with the Chinese study. Our hypothesis is that this will provide a greater differentiation and show the need for a more potent treatment for precisely these patients, who have a great medical need.

The Chinese market approval means that discussions about pricing and reimbursement now begin. This is a lengthy process that typically takes approximately one year, and we therefore do not expect to receive any revenue related to sales milestones or royalties until 2026. Under the license agreement,

Cinclus Pharma is entitled to a low double-digit percentage of milestone payments that Sinorda receives from its Chinese commercialization partner SPH Sine Pharmaceuticals*. These milestones are covered by achieved development goals, regulatory initiatives and sales levels. Cinclus Pharma is also entitled to a low single-digit percentage of ongoing net sales of linaprazan glurate in Sinorda's territory.

During the year, we have made a lot of preparations to be able to start our Phase III program within eGERD. First of all, we have raised capital to strengthen the conditions for carrying out the first Phase III study. We have also worked with an updated formulation and, through our partner Lonza, manufactured the study drug to be used in the study. A large part of the work during the year has also been to collect and document all the necessary data to be able to start the Phase III program, including new Phase I studies.

In the preparations to be able to start the Phase III program, we have also documented completed preclinical studies and worked with ongoing preclinical studies. After the summer, we started all preparations with our contract research organization (CRO), the global Switzerland-based company PSI CRO, which will conduct the Phase III study. We have completed the selection of approximately 100 clinics that will be included in the study and we are now working on verifying, quality assurance and signing agreements with them. The dialogue with the authorities regarding regulatory issues and final study start approval is

ongoing and will be intensified now during the winter and spring. Among other things, we have received approval for our pediatric plan from both the FDA and the EMA, which are important regulatory milestones.

In summary, progress in China and the positive preparations for Phase III make us very positive about the future. We are so convinced of the merits of linaprazan glurate that we intend to demonstrate superiority in our Phase III study. This means that we will try to show that linaprazan glurate is more effective than PPIs according to several study measures. We would not have been able to do this if linaprazan glurate had not shown such strong data. It also constitutes an important market adaptation which, if successful, would make linaprazan glurate unique on the market.

During the quarter, we had an advisory meeting with the FDA regarding the preparations for the start of the first Phase III study. We agreed on which final study reports we still have to deliver before the study can start. We expect to be able to deliver these during the second quarter 2025 and thus be able to start the patient recruitment during the third quarter 2025. We estimate to receive top line results during 2026.

I look forward to getting back to you.

Christer Ahlberg, CEO and President

* SPH Sine Pharmaceutical is a company of Shanghai Pharmaceuticals, one of China's leading listed pharmaceutical and healthcare companies.

Description of operations

Cinclus Pharma is developing the drug candidate linaprazan glurate primarily for the treatment of erosive gastroesophageal reflux disease (eGERD). Linaprazan glurate represents a new class of drugs, Potassium Competitive Acid Blocker (PCAB), which has the potential to replace the current standard treatment, which is proton pump inhibitors (PPIs).

A first generation of PCABs has been registered in e.g. Japan since 2015 and the US since the end of 2023. Linaprazan glurate is the next generation of PCABs and is expected to have better acid suppression over the whole day than PPIs and first generation PCABs. Twenty-four hour healing is necessary to heal esophageal ulcers in the most severely ill eGERD patients. These are the patients with the greatest unmet medical need and are the primary target population for Cinclus Pharma.

Linaprazan glurate is a 'prodrug' of linaprazan that was initially developed by AstraZeneca before the founders of Cinclus Pharma were given the opportunity to take over the development. Several members of Cinclus Pharma's management team worked on the development and commercialization of Losec and Nexium (PPIs) and the development of linaprazan and linaprazan glurate within the AstraZeneca Group. Following the acquisition from AstraZeneca, Cinclus Pharma has since successfully completed several Phase I clinical trials and a Phase II clinical trial of linaprazan glurate as well as several pre-clinical studies. The company is currently working on preparations for patient inclusion in the Phase III program for eGERD.

The company was founded in 2014 when the development and global rights to linaprazan glurate were acquired from AstraZeneca free of charge and without financial obligations.

Cinclus Pharma in brief

High unmet medical need for new medicines for severe eGERD.

Linaprazan glurate provides improved acid control.

> 3 000

individuals have been exposed to linaprazan glurate or linaprazan in clinical trials.

Positive results from the Phase II study have been presented in an EoPh2 meeting with the FDA.

19 million

people in the world with severe eGERD are the primary target group.

Organization with experience in development, commercialization and sales of drugs for acid-related stomach diseases.

Cinclus Pharma Holding AB (publ) is the parent company of the Cinclus Pharma Group. The parent company has one subsidiary in Sweden and one in Switzerland and together they form

the Group. The head office is based in Stockholm, Sweden. In June 2024, the company's share was listed on Nasdaq Stockholm under the ticker CINPHA.

GERD

Cinclus Pharma’s indication area is gastroesophageal reflux disease (GERD). GERD is divided into two main groups, symptomatic GERD (sGERD) and erosive GERD (eGERD). GERD is a disease of the gastrointestinal tract involving the lower esophageal sphincter (LES), also called the upper stomach, an area that includes the muscular ring between the esophagus and the stomach.

If the esophageal sphincter is not working properly, it can cause a backward flow of stomach contents into the esophagus. This can lead to erosions, acid reflux and heartburn, and is known as erosive gastroesophageal reflux disease (eGERD).

Approximately 130 million people of the adult population in the US and Europe suffer from reflux disease*. The global market for the treatment of patients with GERD is dominated by the proton pump inhibitor (PPI) class of drugs. On average, about 10% of patients with mild eGERD (Grade A or B on the LA scale), over 30% with moderate eGERD (Grade C) and over 50% with severe eGERD (Grade D) remain untreated after eight weeks of treatment with PPIs. Almost 50% of GERD patients experience nocturnal symptoms resulting in poorer quality of life. In other words, there is a great medical need for other treatment options.

Despite frequent non-approved off-label prescribing of high doses of PPIs several times a day, many patients still suffer from poor symptom control and unhealed esophageal ulcers, which also indicates a clear need for better medicines to treat GERD. This is also confirmed by market research with both specialist and primary care physicians commissioned by Cinclus Pharma in Europe and the US.

Regulatory and commercial strategy

Linaprazan glurate is being developed for the treatment of severe erosive gastroesophageal reflux disease (eGERD grade C/D) and has the potential to heal esophagitis, i.e. damage to the esophagus and relieve GERD symptoms more effectively than current pharmaceutical treatments such as PPIs and first generation PCABs.

The results of Cinclus Pharma’s market research show that there is a significant unmet medical need for this type of acid-related diseases. Data from Japanese pharmaceutical company Takeda’s successful launch of the first PCAB drug vonoprazan as Takecab, in Japan, and the approval of the same substance in the US under the brand name Voquezna by Phatom Pharmaceuticals confirm the commercial potential of PCABs. Takecab has been the market leader in Japan for a couple of years and became Japan’s largest drug in sales figures in the fourth quarter of 2021*. PCABs have also been successfully launched in South Korea, other Asian markets and South America. Compared with vonoprazan and other PCABs, linaprazan glurate has the potential to provide faster and better acid control over the day.

PCAB is the new treatment regimen that has the potential to replace PPIs. Cinclus Pharma’s goal is for linaprazan glurate to become best-in-class and bring about a paradigm shift in the

treatment of acid-related stomach diseases. The next step is to document the product in a Phase III program, which is intended to lay the foundation for a clear market position reinforced by commercial partnerships and a build-up of the in-house development organization.

Cinclus Pharma’s primary goal for linaprazan glurate is to obtain marketing authorization for the indication eGERD. The focus will be on patients with severe eGERD. In addition to eGERD, Cinclus Pharma will also work towards a market authorization for the treatment of *H. pylori* infection.

Image of linaprazan glurate constituents of the molecule.

Product development

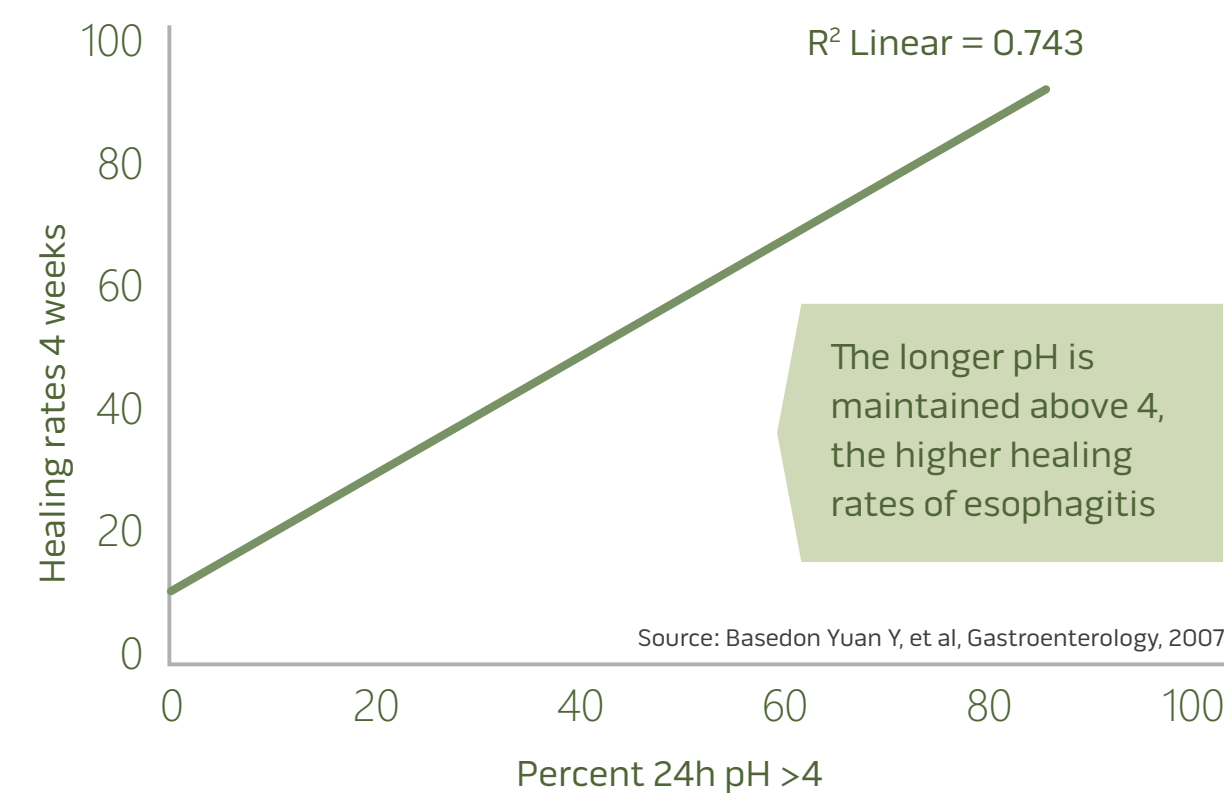

¹⁾ For the Chinese market.

Linaprazan glurate’s beneficial pharmacodynamic properties have been successfully documented in several Phase I studies with positive results. These studies show dose-related acid control, which together with a strong biomarker makes the

company’s clinical development programme a lower risk compared to other new substances in a similar development phase. This is verified by the close to 90% cure rate of the most severe patients in one of the dose groups from the phase II study. Overall, there is an indication of high healing rates of erosive esophagitis in upcoming clinical studies.

24 h acid control is linearly correlated to healing. Mean percentage of time the intragastric pH>4 predicts healing rate.

The strong biomarker shows a clear correlation between time spent with pH above 4 in the stomach and healing rate of esophageal ulcers, see figure to the left. This means that the longer you can maintain pH value above 4 in the stomach over the day (24 hours), the greater the probability of healing of ulcers in the esophagus (provided that the ulcers in the esophagus are caused by acid from the stomach). In Q3, 2024, a Phase I study was published confirming that linaprazan glurate is able to maintain pH above 4 for 96% of the day for the intended dose in the upcoming Phase III study. This is a unique acid control that significantly increases the ability to heal esophageal ulcers even in the most severely ill patients.

Clinical development

The company has completed a successful Phase II study in Europe and the US in 248 patients with the indication eGERD. The primary purpose of the study was to support dose selection in future Phase III programs and was primarily based on healing data in grade C and D patients, and demonstrates that the product is effective and safe. The study provided ‘proof of concept’. The company has conducted several Phase I studies with linaprazan glurate. The latest PK/PD study with the new formulation was presented at the UEGW scientific congress in October 2024, demonstrating the value of its data.

In addition to the Phase I and Phase II studies with linaprazan glurate conducted by Cinclus Pharma, there is extensive documentation of linaprazan glurate’s active metabolite linaprazan, which has been evaluated in 23 Phase I and two Phase II studies in a total of approximately 2,600 patients as well as in many toxicological studies.

To obtain marketing approval for the eGERD indication, which is Cinclus Pharma’s primary goal, the company has started preparations for a phase III programme. The company held an “End of Phase 2” meeting in the fourth quarter of 2023 with the FDA and received acceptance to initiate a Phase III program with linaprazanglurate. The goal is to be able to recruit the first patient in 2025. The program will include two studies.

In addition to studies regarding the indication eGERD, the company will work to carry out phase III studies regarding the indication *H. pylori* infection. Both programs are discussed on an ongoing basis with regulatory authorities and medical advisors to ensure the quality of future applications for approval and to ensure an optimal path towards approval of linaprazan glurate.

Pre-clinical development and CMC

The company has completed and is currently conducting several pre-clinical studies. During the year, photo-toxicological and combi-toxicological studies were completed with good results.

Within the CMC area, the company has developed a new tablet formulation that has advantages in comparison to the previous version that was used in the phase II study. Among other things, the new formulation has better and more stable absorption in the body and provides conditions for more cost-effective manufacturing. During the third quarter, the manufacturing of linaprazanglurate tablets, which constitute study material in the upcoming Phase III study, was completed. Through a robust CMC process, the company has paved the way for the tablet to be available for the conduct of the Phase III study and for commercial use after launch.

Patent

Linaprazan glurate has good patent protection that extends well into the 2040s. The company has already received approval for a polymorph patent in the US, which is valid until 2042, and a formulation patent in Europe, which is valid until 2040. During the year, the company received additional national approvals for the formulation patent in several other countries, in addition to Europe. The company has also made several applications for new patents that are expected to be approved in the coming years.

The company is actively working to strengthen the protection of the substance. To complement the patents, the company is also working on regulatory data exclusivity that provides strong protection against generic competition for the years it is valid. In Europe, there will be data exclusivity of up to 10-11 years from the date of approval of linaprazan glurate. In the US, there will be five years of regulatory data exclusivity from the date of

approval. However, the company has been granted an extension of a further five years by the FDA in the event that it obtains approval for an *H. pylori* indication there as the first indication. It is currently unclear whether this extension also applies to other indications.

Partnerships

Cinclus Pharma has previously entered into a license agreement with Jiangsu Sinorda Biomedicine Co. Ltd (Sinorda) for the development and commercialization of linaprazan glurate in China and other selected regions in Asia. Sinorda has in turn sub-licensed the manufacturing and industrial sales rights for linaprazan glurate in China, Hong Kong, Macau and Taiwan to SPH Sine Pharmaceutical Laboratories Co, Ltd, a member of the Shanghai Pharmaceuticals Group and one of the major pharmaceutical companies in China.

Sinorda applied for registration of linaprazan glurate in China in the first quarter of 2023, which was approved by the Chinese Medicines Agency in December 2024. With the approval, Cinclus has received a milestone revenue of SEK 3.1 million. Earlier in the quarter, Cinclus Pharma received development-related milestone revenue of SEK 1.5 million.

Under the terms of the License Agreement, Cinclus Pharma is entitled to a low double-digit percentage of development-, regulatory- and sales related milestone payments received by Sinorda from its commercialization partner SPH Sine Pharmaceuticals. Cinclus Pharma is also entitled to a low single-digit percentage of the corresponding sales royalties that Sinorda receives from SPH Sine Pharmaceuticals. Sinorda is entitled to receive compensation from Cinclus Pharma, but at half the percentage Cinclus Pharma receives from Sinorda. However, there is a cap on the maximum compensation for these milestone payment.

Earnings per share, diluted ¹⁾ , SEK	–1.17	–1.68	–4.54	–8.20

¹⁾ The period's earnings per share before and after dilution are defined in IFRS. Other key figures in the above table are alternative key figures and thus not defined in IFRS, see further section for definitions and reconciliation of key figures and alternative key figures later in this report.

Net sales

Net sales amounted to TSEK 4,580 (0) during the quarter and to TSEK 4,580 (5,959) during the period January-December. The revenue relates to the fulfillment of development and regulatory related milestones for linaprazan glurate in China, which under the contract with Sinorda Biomedicine, Cinclus Pharma receives royalties on licensing revenues Sinorda Biomedicine receives from its licensing partner in China, SPH Sine.

Operating expenses

Research and development expenses

Research and development expenses (R&D) during the quarter amounted to TSEK -53,360 (-33,253), which corresponds to a cost increase of TSEK 20,107 or 60%. For the full year, R&D expenses amounted to TSEK -136,657 (-166,678), corresponding to a cost decrease of TSEK 30,020 or 18%. As the company has no clinical trials that have started patient recruitment and as the phase III programme is only in the preparatory stage, costs are at a lower level than the comparative period.

Administrative expenses

Administrative expenses during the quarter amounted to TSEK -7,263 (-6,199), which corresponds to an increase of TSEK 1,064 or 17%. For the full year, administrative expenses amounted to TSEK -36,854 (-39,562), a decrease of TSEK 2,708 or 7%. During the first half of 2024, the company had significant costs for IPO preparations. Now that the listing has been completed, the costs are lower than the comparison period. For the quarter, costs have increased compared to the comparison period due to investments in business development. Personnel in finance and administration have also increased slightly due to the fact that the company is now listed on the stock exchange.

Other operating income and expenses

Other operating income and expenses amounted to net TSEK -845 (-303) during the quarter, corresponding to a change of TSEK -543. For the full year, these items amounted to TSEK -707 (-695), a change of TSEK -12. Other operating income and expenses consist of realized and unrealized exchange rate effects on operating receivables and liabilities.

Operating income (EBIT)

The Group's operating profit for the quarter amounted to TSEK -56,889 (-39,754), a change of TSEK 17,135. For the full year, operating income amounted to TSEK -169,639 (-200,976) TSEK, an improvement of TSEK 31,337.

Financial items

Financial income and expenses (net financial income/expense) amounted to TSEK 2,796 (-3,966) during the quarter, which was TSEK 6,763 better than previous year. For the full year, net financial income/expense amounted to TSEK 2,359 (-13,637), which was TSEK 15,996 better than previous year. The positive net financial income for the quarter and the full year is due to interest income on bank funds as a result of the capital raised in the IPO in June.

Income tax

The Group recognized a tax expense of TSEK -166 (-420) during the quarter and TSEK -750 (-505) for the full year. The tax consist of Swiss federal and cantonal tax.

Net income

The Group reported net income after tax of TSEK -54,259 (-44,140) for the quarter. This corresponded to a change of TSEK -10,119 or -23%. For the full year, net income after tax amounted to TSEK -168,031 (-215,118) TSEK, an improvement of TSEK 47,087 or 22%.

Equity and indebtedness

Equity in the Group as of December 31, 2024 amounted to TSEK 555,330 compared to TSEK -76,800 at the end of year 2023, an increase of TSEK 632,130 TSEK as a result of the share issue in connection with the IPO on June 20 2024.

Non-current liabilities at the end of the period amounted to TSEK 190 (6,790) and consist of a lease liability.

Current liabilities in the Group at the end of the period amounted to TSEK 45,493 (164,422), a decrease of TSEK 118,930. The decrease is mainly due to the settlement of the bridge loan from shareholders through an offset issue in connection with the IPO in June 2024. Furthermore, current liabilities consisted of trade payables of TSEK 18,928 (16,448), lease liabilities of TSEK 109 (24), tax liabilities of TSEK 7,449 (7,216), other liabilities of TSEK 2,107 (2,903) and accrued expenses of TSEK 16,899 (6,826). The increase of accrued expenses concern manufacturing of study materials and CRO expenses for the clinical phase III trial, which had not yet been invoiced at the end of the quarter.

Liquid funds and cash flow

Cash and cash equivalents at the end of the period amounted to TSEK 566,716 (87,972), an increase of TSEK 478,745 compared to December 31, 2023. The increase is due to funds the company received in connection with the new share issue at the stock exchange listing on June 20.

Cash flow from operating activities before change in working capital was TSEK -52,499 (-44,229) for the quarter and TSEK -162,195 (-201,581) for the full year.

Cash flow from operating activities including change in working capital amounted to TSEK -78,584 (-63,100) for the quarter. Corresponding cash flow for the full year was TSEK -178,367 (-209,186).

Cash flow from financing activities amounted to TSEK -613 (-339) for the quarter, consisting of arrears in issue costs and amortization of lease liabilities. For the full year, the corresponding cashflow was TSEK 655,200 (122,892).

The total cash flow for the quarter amounted to TSEK -79,197 (-63,440) and for the full year TSEK 476,833 (-86,294).

Financing

Following the IPO on June 20 and the new share issue that was carried out, the Company estimates as of December 31, 2024 that the current working capital is sufficient to the read out of the first Phase III program, which is expected during 2026. The Company will continue to work on the financing strategy, which includes evaluating partners, lenders or other financing opportunities in order to accelerate the development of linaprazan glurate by starting a second Phase III study earlier than planned or starting the *H. pylori* program in parallel with the eGERD program.

Parent company

Cinclus Pharma Holding AB (publ), reg.no. 559136–8765, is the parent company of the Group. The business consists of work with pre-clinical and clinical development, marketing, administrative and corporate management functions. The parent company has two wholly owned subsidiaries, one in Switzerland and one in Sweden, which together form the Group.

The total revenue of the parent company amounted to TSEK 843 (148) for the quarter and TSEK 1,376 (628) for the full year. Operating income for the quarter amounted to TSEK -60,544 (-38,238). For the full year, operating income amounted to TSEK -172,975 (-204,754). Net financial income/expense for the

quarter amounted to TSEK 1,902 (-8,711) and for the full year to TSEK -1,318 (-18,660). The positive net financial income for the quarter is due to interest income on bank funds as a result of the fundraising in the IPO in June 2024. The negative net financial income/expense for the full year where mainly related to interest expenses on shareholder loan and intra-group liabilities.

Net income for the quarter amounted to TSEK -54,350 (-41,293) and the corresponding net income for the full year was TSEK -170,000 (-217,757).

With the transfer of patents and IP rights to the parent company from the swiss subsidiary as of January 1, 2022, the parent company recognizes an intangible asset of TSEK 320,463 (320,463).

Cash and cash equivalents at the end of the period amounted to TSEK 559,632 compared to TSEK 82,304 at the end of 2023, an increase of TSEK 477,328 as a result of the new shares issue in connection with the IPO.

Total Equity in the parent company as of December 31, 2024 amounted to TSEK 795,718 compared to TSEK 168,221 at the end of 2023, corresponding to an increase of TSEK 627,487. Share capital amounted to TSEK 920 (509). The company had on the balance sheet day, December 31, 46,537,789 ordinary shares and 854,430 C-shares.

Current liabilities in the parent company amounted to TSEK 204,977 (329,501) at the end of the period. The decrease of TSEK 124,523 is mainly due to the fact that the bridge loan from shareholders was settled in an offset issue in connection with the IPO. The remaining liability is mainly group internal.

Other information

Personnel

At the end of the quarter, the number of employees was 18, compared to 13 in the same period previous year. The average number of employees during the quarter was 16, compared to 13 employees in the same period last year. All employees are employed by the parent company. At the end of the period, the company had 17 consultants attached to the company.

Dividend

The Board of Directors proposes that no dividend will be paid for the financial year.

Risks

As the company is dependent on additional financing to continue the development of linaprazan glurate in the long term, the refinancing risk is described below. For other risks, reference is made to the description of the Group's significant financial and business risks in the Directors' Report and Note 19 in the Annual report for 2023.

Refinancing risk

Refinancing risk refers to the risk that cash and cash equivalents are not available and that financing can only be obtained partially or not at all, or at an increased cost. The Group is currently financed with equity, and the refinancing risk has been significantly reduced in view of the new share issue that took place in connection with the listing of the company's share on Nasdaq Stockholm on June 20, 2024. In the longer term, the Group is in need of more extensive financing to be able to conduct and implement a second phase III study and registration of the eGERD indication. Additional funding is also required should the Group choose to conduct study programs and registration of other indications such as *Helicobacter Pylori*. The Group cannot therefore exclude being exposed to e. g. risks related to external loan financing in the future.

Notes to the financial information

Note 1 General information

Cinclus Pharma Holding AB (publ), (hereafter Cinclus Pharma) corporate numer 559136–8765 is a limited company registered in Sweden with its registered office in Stockholm. The address of the head office is Kungsbron 1, 111 22 Stockholm, Sweden. The company is listed on Nasdaq Stockholm since June 20, 2024 and the object of the company's operations is to develop and commercialize pharmaceuticals. Cinclus Pharma Holding AB (publ) is the parent company in the group Cinclus Pharma, which consists of the parent company and its two subsidiaries (hereafter the Group). Unless otherwise specifically stated, all amounts are reported in thousands of kronor (TSEK). All amounts are, unless otherwise stated, rounded to the nearest thousand. Figures in parentheses refer to the comparison period.

For the Group's financial assets and liabilities, their reported value is deemed to be a reasonable estimate of the fair value as they essentially refer to short-term receivables and liabilities, whereby the discounting effect is immaterial.

Note 2 Accounting principles

The most important accounting principles applied when these consolidated accounts have been prepared are stated below. These principles have been applied consistently for all periods presented, unless otherwise stated. The consolidated financial statements have been prepared in accordance with the Annual Accounts Act (1995:1554), RFR 1 Supplementary accounting rules for groups, and the International Financial Reporting Standards (IFRS) and interpretations from IFRS Interpretations Committee (IFRS IC) as established by the European Union. This interim report has been prepared in accordance with IAS 34 Interim Financial Reporting and the Annual Accounts Act. The parent company interim report has been prepared in accordance with the Annual Accounts Act and Swedish Corporate Reporting Board recommendation RFR 2. Applied accounting principles

and explanations for these can be found and are consistent with those described in the 2023 annual report for the Group. The consolidated accounts have been prepared on a cost method.

Judgements and estimates

To prepare reports in accordance with IFRS requires the use of some important estimates for accounting purposes. Furthermore, management is required to make certain judgments when applying the Group's accounting principles. The areas that include a high degree of assessment that are complex or such areas where assumptions and estimates are of significant importance for the consolidated accounts, have been reported in the Group's annual report for 2023.

Going concern principle

This interim report has been prepared with the assumption that the company has the ability to continue as a going concern for the next 12 months in line with the going concern principle. See further sections on financing, risks and risk management and note 3.

Note 3 Risks and risk management

Cinclus Pharma's operations, results and position are affected by a number of risk factors that are described in detail in the company's prospectus prepared in connection with the listing of the company's share on Nasdaq Stockholm on June 20, 2024 but also in the annual report for 2023.

The risks and associated risk management considered in the preparation of this interim report apply to all periods and are consistent with what is presented in the risk factors section in the annual report for 2023. With the new share issue in connection with the listing of the company's shares on Nasdaq Stockholm, the refinancing risk has been reduced.

Refinancing risk refers to the risk that liquid funds are not available, and that financing can only be obtained partially or not at all, alternatively at an increased cost. The Group is currently financed with equity. In the longer term, the Group is in need of more extensive financing. Partly to be able to conduct a second eGERD phase III study with subsequent registration of the indication eGERD, but also when initiating new study programs for other indications such as *Helicobacter Pylori*. It can not therefore be ruled out that the Group will be exposed to risks related to for example external loan financing.

Note 4 Net sales

The net sales of TSEK 4,580 (5,959) are based on the agreement between Cinclus Pharma and its Chinese partner Sinorda Biomedicine. The income refers to royalties on license income that Sinorda Biomedicine received from out-licensing to its partner in China, SPH Sine, a subsidiary of Shanghai Pharmaceuticals.

Note 5 Income tax

As of 1 January 2022, an agreement was entered into between Cinclus Pharma Holding AB (publ) and the wholly owned subsidiary Cinclus Pharma AG, entailing that IP rights were transferred to the parent company. As a result of this transfer, a capital gain has arisen in the subsidiary, during the first quarter 2022, and thus a tax expense and a tax liability. The settlement that has been reached with the Swiss tax authority means that the tax liability may be paid in three equal parts, in 2023, 2024 and 2025. As of the balance date December 31, this liability amounted to a total of TSEK 7,449 (13,580), after the two payment was made in December 2023 and 2024. The liability runs with an interest that is determined annually by the Swiss tax authority. The liability can be paid off in part or in full at any time. This tax liability is a fixed liability. A deferred tax asset has not been accounted for in the parent company as it is not considered to be a balance sheet item since there is still uncertainty about future taxable profits.

Employees level 2 (maximum 2 persons)	2	2	2	1775	3550	3550	1775	17750	2412-2712
Total series 2		2	2		3,550	43,300		262,900	
TOTAL series 1 and 2		23	12		66,300	79,975		492,675	

At an extraordinary general meeting on June 3, 2024, two new long-term incentive programs were adopted (one employee stock option program, PO 2024/2027 series 1, and a performance share program). New articles of associations were also adopted at the extraordinary general meeting, pursuant to which the company may issue class C shares in order to secure delivery of shares to the participants in the programs and to secure payment of future social security contributions. No class C shares have been issued yet. The performance share program for employees and the employee stock option program for the CEO and a scientific advisor have been granted and started to be expensed in quarter three, 2024, see adjacent tables.

The performance share program runs for just over three years and participants must retain their employment and invested shares throughout the vesting period in order to receive an allocation of new shares. The number of shares allocated depends on the share price performance and the employment status at the end of the vesting period. As regards the development of the share price, a comparison is made at the end of the vesting period between the initial share price, i.e. the IPO price of SEK 42 per share, and the price at the end of the vesting period. A range between 20% and 60% in share price development results in linearly different allocations of shares. However, a maximum of 360,150 shares can be allocated to participants in the program.

The performance share program generates personnel costs, in accordance with IFRS2 and is initially estimated at approximately SEK 6.8 million and social costs estimated at SEK 6.2 million according to certain assumptions, see also the company's listing prospectus from June 2024.

The new employee stock option program, PO 2024/2027 series 1, also generates personnel costs in accordance with IFRS2 of approximately SEK 1.5 million and social costs of SEK 1.4 million.

The dilution for all incentive programs in the company, at maximum allocation, including C shares, is 1.9%.

Definitions of key figures and definitions and reconciliation of alternative performance measures

In the report, the company presents key figures in accordance with the IFRS regulations. The company also presents so-called alternative key figures, i.e. measures that are not defined according to IFRS. The alternative key figures found in the report are, among other things, costs related to research and development as a percentage of total operating costs, equity ratio % and quick ratio %. The company considers the former to be an important complement because it enables a better evaluation of the company's financial trends. This financial performance measure should not be viewed in isolation or considered to replace the performance indicators that have been prepared in accordance with IFRS.

Furthermore, the alternative performance measure the company has defined should not be compared with other performance measures with a similar name used by other companies. This is because the above-mentioned performance measure is not always defined similarly and other companies may calculate it differently than Cinclus Pharma, see adjacent table for further definitions and reconciliation of KPIs and alternative KPIs.

Reconciliation of alternative performance measures

	Quarter 4		Quarter 1-4	
	2024	2023	2024	2023

Definitions of key figures and alternative key figures

Key figures according to IFRS	Definitions	
Earnings per share for the period before and after dilution	Profit for the period divided by the average number of shares during the period before and after dilution. Earnings per share after dilution is calculated by adjusting the weighted average number of ordinary shares outstanding for an estimated conversion of all potential ordinary shares giving rise to a dilutive effect, which is in accordance with IAS 33 Earnings per share.	
Alternative key figures	Definitions	Reasons for using the key figures
Operating profit (EBIT)	Profit before financial items and tax. The information is taken from the Statement of income.	The key figure helps the reader understand the profitability of the operating business.
Operating expenses	The sum of research and development expenses and administration expenses for the period. The information is taken from the Statement of income.	The key figure helps the reader understand the costs of the operational business.
“Research and development expenses / Operating expenses % **”	Research and development expenses, divided by operating expenses, which consists of research and development expenses and administrative expenses	The key figure helps the reader understand the proportion of costs attributable to the group’s core operations, research and development.
Equity ratio, % *	The equity ratio at the end of each period is calculated by dividing total equity attributable to the parent company’s shareholders by total assets.	The equity ratio measures the proportion of the total assets that is financed by the shareholders.
Quick ration, % *	Current assets in relation to current liabilities.	The key figure shows the group’s short-term ability to pay
Number of shares on the balance sheet date	Number of shares in the company at the end of the period..	The key figure gives the reader an understanding of the number of shares at the end of the period.
Equity per share	Equity divided by number of shares at the end of the period.	The key figure gives the reader a possibility to compare book value with market value.
Cash flow for the period per share	Cash flow for the period divided by average number of shares.	The key figure shows the net cash generated or used on a per-share basis.

* Reconciliation of these key figures can be found on the previous page.

Glossary

Carcinogenicity studies – Tests to assess whether a chemical or physical agent increases the risk of cancer.

Clinical phase I – The first time a new substance is given to a human being. Phase I studies are often conducted with a small number of healthy volunteers to assess the safety and dosage of a yet-to-be-approved treatment.

CMC - stands for Chemistry Manufacturing and Control, and refers to the process of producing and manufacturing medicines.

CRO - stands for Contract Research Organization, and is the company that, together with pharmaceutical and medtech companies, carries out the clinical studies needed to get their products approved by the authorities.

Eradicate - to remove, eradicate, for example, the bacterium *Helicobacter pylori* in peptic ulcer disease.

Esophagitis – is damage to the oesophagus or esophageal catarrh caused by the backward flow of stomach acid into the oesophagus.

FDA – is the US Food and Drug Administration

GERD and eGERD – GERD stands for Gastroesophageal reflux disease and is the collective name for all acid-related esophageal disease. GERD is characterized by symptoms, with or without tissue damage, that result from repeated or prolonged exposure of the lining of the esophagus to acidic or non-acidic contents from the stomach. If tissue damage is present, the individual is said to have esophagitis or erosive GERD (eGERD).

International Non-proprietary Name (INN) – is a generic name used to facilitate the identification of drug substances or active ingredients of medicines.

IPO – IPO stands for Initial Public Offering, i.e. stock exchange listing.

KOL – KOL stands for Key Opinion Leader. A KOL is an expert with proven experience and expertise in a particular field of work. In healthcare, these experts can be doctors, hospital managers, health system directors, researchers, members of patient groups and others.

LA scale – The Los Angeles scale (LA scale) is an accepted way to describe the endoscopic presence of reflux esophagitis and determine its severity. The scale is divided into grades A-D, with D being the most severe grade of reflux esophagitis.

Linaprazan glurate (formerly X842) – A prodrug of linaprazan of the potassium-competitive acid blocker (PCAB) class. Linaprazan has been evaluated in 23 Phase I and two Phase II studies in a total of approximately 2,500 patients. The favorable safety and pharmacokinetic properties of linaprazan glurate have been documented in a phase I study. Linaprazan glurate provides superior gastric acid control compared to current medication.

'Off label' prescribing – The term "off label" is defined as the use of a medicine that deviates from the approved summary of product characteristics, such as use for an unapproved indication, with a different dose or with a different route of administration.

PCAB
PCAB stands for Potassium-Competitive Acid Blocker and is a new class of drugs called acid secretion inhibitors.

Pharmaceutical dossier – Evidence and documentation that forms the basis for the application for drug approval.

Phase II clinical trial – Phase II refers to the first time a medicine under development is administered to patients to study the safety, dosage and efficacy of a yet-to-be-approved treatment regimen.

Phase III clinical trials – Phase III trials involve many patients and often last for a longer period; they are intended to investigate the effects and side effects of the medicine under routine yet carefully controlled conditions.

PPI – stands for Proton Pump Inhibitor and is a group of drugs whose main action is a marked and long-lasting reduction in the production of stomach acid. This type of drug has been the most potent acid secretion inhibitors available for a very long time and is still available today. The first product, omeprazole, was launched in 1988 under the brand name Losec. Proton pump inhibitors are among the best-selling medicines in the world.

Preclinical phase – In the preclinical phase, various types of tests and experiments are carried out in a lab environment. These tests take place before a drug project enters the clinical phase.

'Prodrug' – A 'prodrug' is an inactive drug in the form in which it is taken. Once the prodrug has entered the body, it is converted into the active form. The conversion takes place by changing some part of the chemical structure of the medicine.

Proof of Concept (concept validation) – This concept is also known as 'PoC'. It refers to a prototype or study that covers all key features. The aim is simply to prove that the concept works

QIDP – The granting of a product as a qualified device for the treatment of infectious diseases. The grant is decided by the US Food and Drug Administration (FDA), giving 5 years of data exclusivity. QIDP stands for Qualified Infectious Disease Product.
